AI-Powered Graphic Designer | UX/UI Designer | Creative Technologist

Creative and detail-oriented designer with strong UX/UI foundations and hands-on experience blending **visual design, brand systems, and AI-assisted workflows**. Proven ability to design polished, consistent, and scalable digital experiences across web, marketing, and interactive platforms.

Brings a rare combination of **aesthetic judgment, technical execution, and AI experimentation**, allowing seamless collaboration with developers, product teams, and marketers. Adept at refining AI-generated visuals into premium, brand-aligned assets while maintaining usability, accessibility, and performance standards.

CORE DESIGN & CREATIVE SKILLS

Graphic & Visual Design

- Visual identity systems, layouts, typography
- Digital & print assets (web, social, presentations, campaigns)
- Brand consistency & premium design standards
- Asset organization & design handoff

UX / UI Design

- Wireframes, user flows, high-fidelity UI
- Web & mobile interface design
- Design systems & component libraries
- Accessibility & usability best practices

AI-Powered Design

- AI-assisted ideation & visual generation
- Refining AI outputs into brand-ready assets
- Rapid concept iteration using emerging tools
- Human-centered design judgment over automation

Tools

- Figma
- Adobe Creative Suite (Photoshop, Illustrator)
- AI tools: MidJourney, DALL·E, Firefly (concept & asset generation)
- HTML, CSS, JavaScript (design-to-development collaboration)
- GitHub (version control & portfolio delivery)

PROFESSIONAL EXPERIENCE

Intern – Web Designer / UX-Focused Developer
Cyber Hygienique – Montreal, QC
Sep 2024 – Dec 2024

- Designed and refined **visual layouts, UI components, and content structure** for a corporate website with a strong emphasis on clarity, branding, and usability
- Translated business and marketing requirements into **clean, user-friendly interfaces** aligned with brand identity
- Collaborated with stakeholders to iterate on designs based on feedback and usability considerations
- Prepared **design-ready assets and documentation** for smooth development handoff
- Balanced aesthetics with performance, accessibility, and maintainability

---

Trainee Web Designer / Creative Technologist
Techaronic IT Solutions – Remote
Dec 2021 – Aug 2022

- Designed and implemented **web layouts, visual elements, and UI interactions** using HTML, CSS, and JavaScript
- Applied typography, spacing, and color theory to enhance visual hierarchy and user engagement
- Optimized images and visual assets, improving page load performance by ~25%
- Supported branding efforts through consistent UI patterns and reusable design components
- Worked closely with senior developers to align design intent with technical constraints

---

Software Support Executive (UX-Oriented Role)
Visual InfoSoft – India
Mar 2021 – Oct 2021

- Analyzed user issues and usability pain points in enterprise software systems
- Collaborated with technical teams to improve clarity, workflows, and user experience
- Documented interface behavior and interaction flows to support product improvements
- Gained strong exposure to **human-centered problem solving and system usability**

SELECTED PROJECTS

Matrix-Themed Interactive Portfolio
lucifer7600.github.io/Portfolio

- Designed a **high-impact, brand-driven portfolio experience** inspired by Matrix aesthetics
- Built a cohesive visual system using typography, color, motion cues, and layout consistency
- Integrated interactive elements to enhance engagement and storytelling
- Demonstrates strong **visual judgment, UX thinking, and creative experimentation**

UI-Focused Web Applications (Multiple Projects)

- Designed user interfaces, layouts, and visual components for database-driven web applications
- Created wireframes, UI structures, and interaction patterns before development
- Ensured consistency across screens while adapting designs for different use cases

Mobile Habit Tracker App (UX/UI Focus)

- Designed clean and intuitive mobile UI for habit creation and progress tracking
- Focused on simplicity, clarity, and user motivation through thoughtful UI decisions
- Balanced functionality with visual minimalism and accessibility

EDUCATION

AEC – Information Technology Programmer Analyst
LaSalle College, Montreal
Sep 2023 – Dec 2024
Relevant Focus:
UX-aware application design, web interfaces, system analysis, user-centered development

Bachelor of Computer Engineering
Gujarat Technological University, India
Jul 2017 – Jun 2021
CGPA: **8.50**

LANGUAGES

- English – Fluent
- French – Basic
